

# C-DASS

## Data Analysis Server System

### PRODUCT DESCRIPTION

Molins Langen presents the Celsius Data Analysis System (C-DASS) system as a valuable tool used to analyse data recorded by Celsius devices. C-DASS provides electronic traceability to product data, operator identification and production times; eliminating paper trails and potential issues caused through human error.

In addition, the use of a barcode reader attached to the Celsius instrument provides seamless data input and selection. This is important for meeting conformance as part of an HACCP programme.

The C-DASS solution includes complete hardware and software platforms thus removing the need to install host software components and SQL databases on the customer's servers.

The software communicates directly with the Celsius SQL database and by using the search fields in the User interface the user can easily extract and query a range of properties from product names to staff members and date ranges. This information can then be displayed as a data table or a graph, and can be exported into a range of formats and reports.

C-DASS is available as an option further increasing the functionality of the Celsius instrument.

### FEATURES

- C-DASS provides a centralised data view of all Celsius devices on customer networks
- Gives access to real time and historical temperature monitoring data
- Enables summarisation of non-conformance
- Single database for audit purposes
- Access to data by machine / operator / time & date
- Data graphing / saving / conversion to PDF / Excel / Word

## TECHNICAL SPECIFICATION

C-DASS Specification	<p>Software &amp; hardware bundle includes:*</p> <p><b>C-DAS:</b> “Celsius Client (installed on Celsius Machine), Celsius Host, Celsius SQL Database and Celsius DAS (Data Analysis Software) installed on server PC” **</p> <p><b>Hardware:</b> “Processor : Intel Core i3-6100 / 4GB RAM / 128GB SSD</p> <p><b>Operating System:</b> Windows 10 Pro DG, Windows 7 Professional / Desktop PC</p> <p><b>Memory:</b> 4GB DDR4 SDRAM, 2133 MHz</p> <p><b>Hard Drive:</b> 128GB SSD</p> <p><b>Chassis:</b> HP ProDesk 400 G3 Small Form Factor ”</p>
----------------------	---

\*Preinstalled software on HP ProDesk 400 G3 Small Form Factor or similar specification

\*\*Customers wishing to install C-DAS on their own server are asked to refer to the minimum hardware specifications requirements and operating system requirements for “Celsius Host”, “SQL Server Express 2008” and “C-DAS”.
