

PRESS RELEASE- for immediate release

Langen Packaging Group Introduces the *Langen C-1000™* *End Load Cartoner*

Mississauga, Ontario – (November 2010) – Langen Packaging Group introduces the latest innovation for End Load Cartoning. The *Langen C-1000™ End Load Cartoner* includes standard features to improve ergonomics, increase uptime and boost line efficiency.

Focus on improving overall performance has led to incorporating key features that allow three-dimensional changes in less than ten minutes and incorporating TPM characteristics allowing full view of the equipment and enhanced operator access. To improve sanitation and ergonomics, a low-level carton magazine eliminates the need for steps and load platforms. For more information visit www.langengroup.com
